He said that he and Steve Etcher would be doing interviews determine qualifications for appraisers to do the road, dock and rail spur. He said that they would most likely do them by phone. He said that 1 company could do them all or different companies for each. However, Steve feels that the best solution would be to have 1 company do them all. He also mentioned that Union Pacific highly recommended that they use one company that does it all. He stated that he had no idea what it would cost. He did say that Steve said the only concern would be to see that they stayed within the parameters of the grants.

TranSystems had been recommended. Ald. Wade asked if they were talking about a barge or fixed dock? He stated that in high water a fixed dock would be safer. Adm. McGill said that Steve would be available for a phone consultation to answer any questions they may have. He said that they had to approve the qualifications before they could move to the next step. Atty. Bock said that he would call the City Engineer in Memphis to see who they might recommend. Ald. Cravens said that Nucor in Sedalia had chosen TranSystems for that job.

Adm. McGill said that he would be looking at our remaining assets in the Industrial Park to see what we might need or want to do with them. He stated that some individuals had mentioned that they would like to secure some of those assets to help with eligibility for grants.

Ald. Wade made a remark that the gate at the Dock was open the last time he was down there.
